

CableTrunk

Accessory for fire detector cable trunking

Practical, elegant, discreet

CableTrunk is a solution for safe and aesthetic joining between the Ajax mains-powered FireProtect 2 AC and a cable trunk. Run power wires from the side of the detector while preserving the neat look of the ceiling.

Key features

Sleek look of the installation with only 9.5 mm of added height	Effortless cable routing to WAGO 221 connectors	Clear visibility of a fire detector's LED indicators
Iron-clad joining with SmartBracket mounting panel	Compatible with standard cable trunks 16x16 mm / 40x16 mm	Two colors

Hassle-free installation

CableTrunk hides wiring without complicating a thing. The accessory offers easy cable routing from a typical cable trunk to WAGO 221 connectors. Durable latches and holding screws allow for quick and reliable fastening with the SmartBracket mounting panel. With CableTrunk, installing FireProtect 2 AC takes only a few minutes.
